

Write the data report

About 20 minutes. Read the model. Then write your own paragraph about a new graph.

1 Read the model

A good paragraph has a finding, evidence and a careful conclusion.

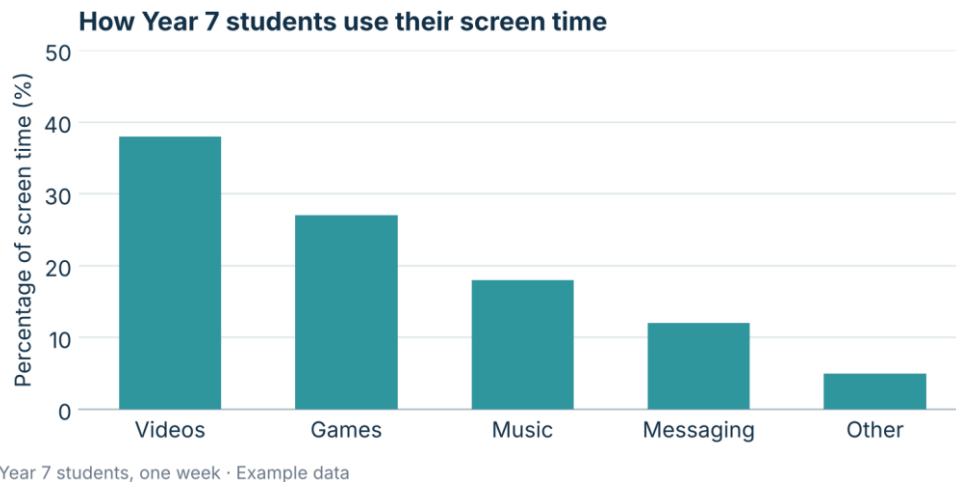

The graph shows daily screen time for Year 7 students in one week.

FINDING Students spent the most time on screens at the weekend.

EVIDENCE Screen time was 210 minutes on Saturday, compared with only 85 minutes on Tuesday.

CAREFUL CONCLUSION This suggests that students have more free time at weekends, but the graph does not show what they were doing, so we cannot be sure.

2 Look at your graph

3 Write your paragraph

Make it your own. You do not have to copy the model.

[Say what the graph shows. Give a finding, evidence with figures, and a careful conclusion.]

4 Check your paragraph

Tick each one.

☐ a clear finding

☐ evidence with figures and units

☐ a careful conclusion
