

Patterns & Data

Big question: What does the data show, and what does it not show?

YOUR GOAL

Write a data report of 180–220 words about two Geography graphs.

PART 1 Read and describe

Lessons 1–4

L1

Reading data displays

I can read a graph or table and say what it shows and what it cannot tell me.

L2

Good questions, good data

I can say why a survey question is useful or weak, and improve it.

L3

From numbers to sentences

I can turn numbers and percentages into accurate sentences.

L4

Spot the pattern

I can describe a trend and keep predictions separate from evidence.

PART 2 Judge and interpret

Lessons 5–7

L5

Best display for the job

I can choose the clearest graph for a question and explain why.

L6

Is that a fair conclusion?

I can decide if a claim is supported and fix an overclaim.

L7

Listen to a data briefing

I can listen to a spoken briefing and connect it to a graph.

PART 3 Write the report

Lessons 8–12

L8

Science results explainer

I can write a results paragraph with a finding, evidence and a careful conclusion.

L9

Spoken model to written report

I can see how a spoken briefing becomes a clear written report.

L10

Guided practice report

I can plan, say and write a full practice report.

L11

Assessment: data report

I can show what I can do in a written data report on two new graphs.

L12

Improve your report

I can say what worked well and improve one part of my report.

KEEP GOING Add words to your Vocabulary book and phrases to your Language Bank.

HOME CHALLENGES Practise at home after Lessons 3, 4, 6, 7 and 9.

YOUR REPORT WILL SHOW THAT YOU CAN...

1

Find the main findings

2

Use numbers as evidence

3

Make careful conclusions

4

Organise clearly

5

Use clear data language

ON ASSESSMENT DAY

20 min plan with the graphs

30 min write on your own

10 min check and improve
